

revealed in ancient animal life cycles

Sandie Degnan/Huifang Yuan: Environmental regulation of cell state reprogramming

(~1 hr)

19:00

16:45 Alexandros Sotiropoulos: First indication of structural homology and co-evolution of candidate effector proteins of diverse fungi that attack other fungi

Tsering Chan: DNA methylation changes in response to infection by a co-evolved parasite in cane toads

Welcome drinks at Saint Lucy (Caffe e Cucina), Blair Drive, University of Queensland

University of Queensland

Brisbane, Qld, 2025
